Be in the know for school events

Calendar K–12™
Keeps parents and the community actively involved in your district meetings, school activities and more.

"I really like the way that you can get category-specific information by day, week or month. When searching by week for performing arts, certain days on the calendar became bold and I was able to view week to week or day to day with just a click."

—High School Parent

CALENDAR K–12™
Keep parents involved

There are some events parents can't afford to miss— Calendar K-12™ keeps parents involved in school activities.

Contact Central™ is installed on your server and requires **no** ongoing fees.

Calendar K–12™ — helping parents stay involved with school activities

Events are hard to keep track of and sometimes dates change. When you consider all the schools in your district, that's a lot of updating. And, most importantly, parents and the community need to be informed in order to participate.

This interactive, on-demand application integrates into your district's web site and allows you to provide current dates for all district-related events. Calendar K–12™ offers parents and community members instant online access to the most up-to-date school and district events.

"The adjustment to Calendar K–12™ was pretty seamless. Now, all the schools link to one universal calendar. It has helped me better organize a set of standards for communication in the district."

— Christopher Burlingame, Webmaster, Waterford School District

Organization for all

Calendar K–12™ helps parents and community members remain organized and involved with your district. Staff can add content to their own calendars for specific dates, times and locations. Events can be created for building groups, such as "All Elementary Schools," "All Middle Schools," and "All High Schools." Events can also be imported through our easy-to-use import feature.

Functionality

Rather than relying on paper, parents and the community can access Calendar K–12™ online, at their convenience. Parents can combine calendars to create a personalized versions to suit their specific needs. They can even combine categories from different schools, including: Lunch menu, PTA meetings, Vacations days, TV schedule, and more! They can display and print calendars for all district events by day, week, or month.

Technology and security

Calendar K–12™ offers multi-level security to support users throughout the district. Like our other applications, it is installed on your in-district Windows® server and, in most cases, can use your existing network usernames and passwords. Calendar K–12™ is integrated into your district's web site and requires minimal administrative time. It's also compatible with common browsers and can be customized if you have specific needs.

Feedback from parents...

- "Easy to use and find dates."
- "I can view several activities at the same time."
- "Now I can keep my children's schedules organized!"
- "The printer-friendly option is helpful. I can hang the calendar somewhere visible."
- "I can print multiple schools on a single calendar!"

With Calendar K–12™, parents and community members have access to:

- School schedules
- Athletics information
- Activities
- Lunch menus
- District meetings
- Report card dates
- Half-days and school closings
