

Attract and hire the best

Go paperless with LTGI

Customer service

The Lindner Technology Group, Inc. is committed to providing high quality products and customer service. Regular customer contact ensures that your staff has consistent support and updates.

The technical staff

Applicant Central™ is installed in your district, on your server. It's browser-based so you just need a standard Internet browser to use it. Applicant Central™ is built on industry-standard products, including Microsoft® Windows operating system, IIS, and SQL Server database. We work with you and your IT staff to integrate Applicant Central™ into your existing web site & network, so the installation is fast and easy.

APPLICANT CENTRAL™
It's easy to find the right people

Finding the right person for the job can be difficult. Applicant Central™ takes the hassle out of the hiring process.

Affordable pricing—We offer a one-time fee that is based on the size of your school district and particular needs. Call us today for a personalized demonstration of how Applicant Central™ makes it easy to attract and hire the right candidates. It may even leave time for that apple on your desk.

Applicant Central™— hiring for the future

Posting positions, reviewing applications and hiring can take up a lot of time. When you're busy opening mail and sorting and filing resumes, automating the hiring process may seem like a dream. There is an answer. The Lindner Technology Group, Inc. has simplified this process by creating Applicant Central™. Now it's easy for districts of any size to find and hire the right candidate.

Take a look at what Applicant Central™ can do:

- Speed up and simplify the hiring process
- Lower administrative costs
- Create a resume database
- Provide customization, customer service, and user-friendly training
- Affordable pricing

“There’s no need to manage paper anymore! Applicant Central™ provides an internet-based system that can easily manage thousands of applications.”

—Maureen Kelly,
Assistant Superintendent
for Human Resources,
Troy School District

Speed up and simplify the hiring process

Applicant Central™ combines recruiting, qualifying and hiring into an automated and seamless process. Candidates search for job postings in your district, complete on-line applications, upload their resumes, transcripts, certificates, and other documents. They can also check job and application status. And since the system communicates instantly via e-mail, you’ll spend less time answering telephone questions. With Applicant Central™ you’ll save hours of valuable staff time.

Lower administrative costs

Applicant Central™ reduces numerous costly paper trails. Instead of resumes, applications and certifications being assembled and filed by hand, your staff will be able to search for qualified candidates quickly and easily. The automation provided by Applicant Central™ allows you to save time and money—freeing you up to tackle your never-ending project list in your department.

Resume database

Applicant Central™ automatically creates an electronic resume database of qualified applicants that is exclusive to your district. This database can be accessed at any time, and from any location—even from home. You can instantly search for candidates by certificate, job preference, and other criteria. In addition, you determine how long resumes remain in the database.

Customization

We specialize in the unique needs of K–12 districts. Applicant Central™ is fully customizable to your preferences—colors, logos, text and data fields.

Training

Because Applicant Central™ is so user-friendly, training usually takes a few hours. Training is included and additional support is always available.

“Before Applicant Central™, we needed a full-time staff person to handle just the application process. Now we handle position fulfillment AND other pressing projects that have been on hold.”

—Terry Serbin,
Assistant Superintendent,
Monroe Public Schools
