

Stop printing staff directories

Go paperless with LTGI

Contact Central™

- Paper directories and print costs are virtually eliminated
- Revisions and updates are easy and efficient
- Contact information is current— no more outdated directories
- Accessibility is controlled with multiple security levels and password protection
- Paper directories are duplicated electronically

“Contact Central™ provides tremendous cost savings. Rather than print an expensive staff directory that’s out-of-date the moment it’s published, we now offer an online version that can be updated and maintained easily and efficiently.”

— Tim McAvoy,
Director of Community Relations,
Troy School District

CONTACT CENTRAL™
Stay up-to-date

Important contact information doesn't belong in a little black book— Contact Central™ keeps your staff directory accessible and secure.

Contact Central™ — digital staff directory

By the time school starts, phone numbers, building locations and even names are outdated. Now you can provide up-to-date contact information to the public without the frustration of missed changes and print costs.

Contact Central™ converts K–12 paper staff directories into a digital format that can be accessed through your web site. Parents, staff and the community has real time access and can search and print a customized PDF version that matches your current paper format.

Convert your paper staff directory to a digital paperless process with Contact Central™.

Contact Central™ is installed on your server and requires **no** ongoing fees.

Up-to-date contact information

With Contact Central™ every version of your directory is the latest. Staff contact information can be imported at any time into Contact Central™, meaning it's always up-to-date. You can provide phone, e-mail, district building, and other fields you specify. We work with you to identify specific district needs and match your current paper directory.

Lower administration costs

With Contact Central™ you can distribute the responsibility of maintaining your directory to staff, a department or individual — which streamlines staff time. Contact Central™ also eliminates the need for printing paper directories that are so quickly outdated.

Technology

Contact Central™ is easily incorporated into your existing web site and requires no IT staff time. It allows parents, community members and staff to search the database and print a customized version in a PDF format (via Adobe Acrobat®). Contact Central™ has an administrative system with multiple security levels, full record editing, and the ability for employees to securely log in and access the private internal staff directory.

“The overall value of the Contact Central™ has been great! Anyone can get the most up-to-date contact information online.”

— Amy Schwenck,
Personnel Office Secretary,
L'Anse Creuse Public Schools

Access

Parents, community members and staff can find information, including: name, title, phone, e-mail, building location, and more. Staff can login and access more extensive information such as: home address, home phone, spouse name, etc. With Contact Central™ you control the accessibility of all information.
